# CHRR Data Enclave Services
"The Data Glove Box"

Service Information

A Data Enclave is a secure network through which confidential data, such as identifiable information, can be safely stored in a controlled environment. In a virtual data enclave, a researcher can access & work with the data from their own computer, but cannot download or remove it from the remote server.

Data storage up to 50 GB is included with all Data Enclaves; please contact us for a custom quote for High Performance Computing or Large Data Sets.

Pricing

ONE-TIME SETUP FEES

Service	Price
Unique Data Enclave Setup Fee	$2,500/enclave
User Setup Fee	$75/user

ONGOING FEES

Service	Price
Bulk Data transfer for similar data structures	$75/transfer
Annual concurrent access license	$100/concurrent user
Annual Maintenance & Security per Data Enclave	$150/month

User setup fee and Annual concurrent access license are independent of number of enclaves; additional user setup & annual access license fees are not needed for access to additional enclaves. CHRR can give varying enclave access to each user based on what permissions the PI determines.

Research Group Example

Dr. Nadir needs 3 separate data enclaves and has 5 group members (6 including herself) that will need varying access to some-to-all of these enclaves. Only one group member will need access to the enclaves at a time (concurrent access), and they've decided to transfer data into the enclave once per month.

ONE-TIME SETUP FEES

Service	Amount	Cost/UOM	Total
Unique # of Projects	3	$2,500	$7,500
Group Members/Collaborators with access	6	$75	$450
TOTAL ONE-TIME SETUP FEE			**$7,950**

Example pricing continued on next page.

THE OHIO STATE UNIVERSITY

Research Group Example (continued)

ONGOING FEES PER YEAR

Service	Amount	Cost/UOM	Total
# of Bulk Data Transfers/year	12	$75	$900
# of concurrent users	1	$100	$100
Maintenance & Security (all enclaves)	12 (x 3)	$150	$5,400
TOTAL ANNUAL COSTS			**$6,400/year**

Data Enclave Cost Calculator

Enter your data enclave needs in the Amount columns, and the total estimate will be calculated for you in the Totals column.   (Please note the 'Maintenance & Security' amount will be multiplied by the 'Unique # of Projects' amount you enter.)

ONE-TIME SETUP FEES

Service	Amount	Cost/UOM	Total
Unique # of Projects		$	$
Group Members/Collaborators with access		$	$
TOTAL ONE-TIME SETUP FEE			$

ONGOING FEES PER YEAR

Service	Amount	Cost/UOM	Total
# of Bulk Data Transfers/year		$	$
# of concurrent users		$	$
Maintenance & Security (all enclaves)		$	$
TOTAL ANNUAL COSTS			$
