

A closer look: CHRR's data repository interfaces

PRIVATE VIEW

An example of key features that an authorized user would see for a dataset in CHRR's data repository

The screenshot shows the private view of the 'CFM Data' dataset. The breadcrumb trail is 'Organizations / CHRR / Consumer Finance Monthly / CFM Data'. A red callout bubble labeled 'Request Data Button' points to a green 'Request Data' button in the top right. The main title 'CFM Data' is on the left, with another red callout bubble labeled 'Metadata Available and Searchable' pointing to the text area. The text area contains two paragraphs of descriptive text. A third red callout bubble labeled 'Digital Object Identifier' points to the 'Cite this as' section, which provides a citation and a DOI link. On the left side, there is a 'Resources' table with three entries: 'CFM User's Guide', 'CFM Website', and 'CFM Codebook'.

Metadata Available and Searchable

The Consumer Finance Monthly (2005-2013) was a study used to track American's financial management - especially how they handle credit, credit cards, their assets and liabilities. This study sampled consumers monthly to uncover important trends in the financial management of the American consumer to detect shifts in spending behavior, financial health and the accumulation of both assets and liabilities.

This was a research project, not a market research survey. The project was based at The Ohio State University (OSU) and was guided by researchers at OSU, the Wharton School of Business, the Federal Reserve Board, and researchers at some of the largest banks in America. These data were used to study consumer behavior, forecast economic activity and track the financial health of consumers. Another major purpose of the project was to study how consumers were preparing for retirement. It's essential to have good data on the assets and liabilities of American households if we are to understand how people are preparing for retirement and managing their assets.

PUBLIC VIEW

An example of key features the public would see for a dataset in CHRR's data repository

The screenshot shows the public view of the 'CFM Data' dataset. The breadcrumb trail is 'Organizations / CHRR / Consumer Finance Monthly / CFM Data'. In the top right, there are two red callout bubbles: 'Private Data Access via Download' pointing to a red 'Download' button, and 'Data API' pointing to a green 'Data API' button. The main title 'CFM Data' is on the left, with a red callout bubble labeled 'Inline Data Preview' pointing to the text area. The text area contains a URL, two paragraphs of descriptive text, and a table view selector with 'Table' and 'Filtered Data' options. At the bottom, there is a search bar, a 'Go' button, and a 'Filters' button. The page also shows '4706 records' and a pagination control.
